SYBREN BACKX

Applied Computer Science Student

Profile

I am an **Applied Computer Science** student at Thomas More Geel with a strong interest in software development and problem-solving. I enjoy tackling technical challenges and continuously improving my skills and gaining practical experience through projects, internships, and new technologies. Experienced with **Angular**, **.NET**, **SQL Server**, and modern web development tools, I am eager to grow within a motivated development **team**.

Experience

- 2026 May** **Software Developer Intern**
 - Dover Fueling Solutions
 - Developed an interactive dashboard map for real-time station visualization and monitoring using Angular.
- 2026 Feb**
 - Built backend components and APIs with .NET and Microsoft SQL Server.

Education

- 2026** **Bachelor Applied Computer Science**
 - Specialisation: Application Development
- 2024**
 - Thomas More Geel

Additional Experience

- 2024** **Volunteer work**
 - Archive/Document management | Mekanders
- 2019**
 - Farm Labour | De Ponyhoeve Turnhout vzw

Projects

- Interactive Station Dashboard**
 - Built a map-based dashboard for station visualization and monitoring using Angular, .NET, and SQL Server.
- CloudWay System AI Integration Layer**
 - Developed a Node.js/TypeScript framework for secure system-to-system AI integrations with APIs, webhooks, and multi-model inputs.
- Portfolio Website**
 - Personal portfolio built with Astro and deployed on Netlify to showcase projects, skills, and experience.
